EDUCATION

Virginia Tech

B.S. in Computer Science

May 2028

Blacksburg, VA

TECHNICAL SKILLS

JavaScript, TypeScript, **Python**, **SQL**, Docker, Flask, Node.js, **PyTorch**, **Scikit-Learn**, **Pandas**, React.js, REST APIs, Express, MongoDB, PostgreSQL, Windows Command Line, Linux Command Line, Bash Scripting, Google Cloud Platform, Claude Code

EXPERIENCE

KnotAPI (backed by AMEX, Plaid, and 8VC)

May. 2026 - Aug. 2026

Software Engineer Intern

New York City, NY

- Shipped **80+ production-critical parser fixes** powering Knot's Subscription Manager integration with Cashapp, improving reliability across **300M+ production parser executions**.
- Built ClaimFile, a **new product** that identifies eligible class-action settlements from users' connected merchant accounts and prefills claims; validated the workflow through **700 beta tester claims in staging**.
- Built an AI chat experience within the Knot SDK, integrating **70+ tools and custom widgets** across Knot's product suite, improving response speed and accuracy by **80%+** over the previous system.

VTHacks

Jan. 2026 - Present

Technical Lead

Blacksburg, VA

- Lead a **five-engineer team** building a real-time React Native and Expo platform used to operate VTHacks for 1,000+ participants across mobile and web.
- Expanded the platform beyond VTHacks to successfully power the **Audible sponsored NJ Code & Coffee Hackathon**.

NASA RAM @ IDOpt Lab

Jan. 2026 - May 2026

Researcher

Blacksburg, VA

- Contributed to NASA's Regional Air Mobility (RAM) program under the mentorship of Dr. Darshan Sarojini.
- Engineered Python models to analyze airfare data and predict fares across west Appalachian routes.
- Designed a highly performant web tool to explore predicted trips on a deck.gl based map.

IDPRO @ Virginia Tech

Jul. 2025 - May 2026

Research Project Lead

Blacksburg, VA

- Led a 5-member research team automating workflows for spatial audio generation, in collaboration with **Guggenheim Fellow Dr. Eric Lyon**.
- Developed an end-to-end audio processing pipeline integrating OpenAI Whisper, Facebook DEMUCS, and Gemini for intelligent sound separation and scene adaptation deployed on Google Cloud Run.
- Authored a successful proposal securing a \$1,000 ICAT SEAD Grant to support ongoing research.**

PROJECTS

SomeoneSaveUs | 2nd Place Overall @ HackPrinceton 2026 | Three.js, Convex, Digital Ocean

Mar. 2026

- Built a multiplayer Photon iMessage based productivity Three.js game supporting 50+ game sessions with 4 players each, where real-world actions drive synchronized in-game progression.
- Developed a multi-agent AI system (K2 Think V2) with persistent personalities, equipped with a tooling harness to autonomously trigger actions and message users, enabling goal validation, social feedback, and dynamic narratives
- Implemented image-based quest validation and a real-time backend for automated habit verification. Deployed on DigitalOcean.
- Awarded Best Entertainment and Media Hack, Runner-up for Sonar, and Honorable mention by MBZUAI.**

Dime | Capital One Prize @ HackViolet26 | React, KnotAPI, Photon iMessageKit

Feb. 2026

- Architected and Engineered a suite of interfaces to help users always access their best credit card for a purchase based on reward rules.
- Built a Photon iMessage agent, Chrome extension, and React dashboard, integrating KnotAPI to retrieve SKU-level transaction data and deliver in-context card recommendations at checkout.
- Developed receipt ingestion and conversational Q&A capabilities, allowing users to text transactions in-store and receive instant best card recommendations.

PiggyBank | 3 Awards @ HackPrinceton 2025 | KnotAPI, Photon iMessageKit, Flask, React

Nov. 2025

- Built a financial agent that learns users' financial habits to predict users' next transactions to nudge them via iMessage to help develop better financial habits.
- Integrated Knot's **Production TransactionLink** with Photon's **iMessage Kit** to deliver real transactional insights and nudges using a custom prediction model deployed on DigitalOcean, powered by vector search in Snowflake.
- Awarded 2nd Place by Knot, Best use of DigitalOcean by MLH, and Honorable mention by Photon Framework.**
